

CONSISTENTLY DELIVERING ON OUR PROMISES

QUALITY AND PERFORMANCE VALUE

Ohio Stamping and Machine is well recognized within the metal processing industry as a high quality manufacturer of medium to large, first operation blanks and metal stampings for medium and high volume users in the automotive, truck and appliance industries. It's a reputation that has been earned ... one

piece at a time, over a period of 20+ years. The operation is ISO 9002 registered QS-9000 compliant to ensure repeatability of even the most critical tolerances. Ohio Stamping and Machine has ten automatic press lines in its 140,000 sq. ft. facility. Exposed and unexposed blanks are processed and either cut-to-length or die-cut configured. Coil processing capabilities include:

- .019" to .225" gage range
- 80" maximum coil width
- 70,000 lbs. maximum coil weight

TOOL DESIGN AND ENGINEERING SUPPORT

Ohio Stamping and Machine maintains a state-of-the-art tool room facility fully staffed with well-trained, experienced professionals. From simple shapes to complex configurations, precision tooling is designed and developed quickly and accurately to minimize initial costs as well as streamline the concept-to-delivery process. Ohio Stamping and Machine has qualified, in-house engineers available to work with your engineering team to produce the precision component or blank needed, in the most efficient, cost-effective way possible.

AN ATTITUDE TOWARD CUSTOMER SERVICE

Along with the processing capabilities, tooling and engineering expertise, Ohio Stamping and Machine prides itself on its attitude for excellence in customer service. It is a vital part of the company's overall business values and another aspect that differentiates Ohio Stamping and Machine from all others. Service and support programs include EDI capabilities, JIT shipping, real-time inventory management and complete material management responsibility. Concern, attention and response are hallmarks of Ohio Stamping and Machine's customer service attitude.

TOTAL PROJECT CAPABILITIES

Ohio Stamping and Machine has the capabilities to manage the total project from start to finish to optimize cost-effectiveness, ensure on-time delivery and consistently meet the highest standards of quality. The process begins with in-house engineering and die design/build capabilities and continues with attentive production die maintenance services that save the customer money by extending the life of the die. Ohio Stamping and Machine also provides delivery reassurance by maintaining in-house back-up presses for every die. The total project is effectively managed by a scheduling and tracking system that is second to none. Customers depend on Ohio Stamping and Machine to assume complete responsibility from incoming coil to delivered product.
